SIDDHIVINAYAK ENTERPRISES

Industrial Components Manufacturer

★ Since 2022

Quality • Reliability • Innovation

ABOUT US

Established in 2022 at Plot No G-89 Site-B Surajpur Industrial Area Greater Noida.

WE SPECIALIZE IN:

- EVA Gasket
- Silicon Gasket
- Plastic Injection Mould Components
- EPE Foam Fitments
- Paper Insulation Products
- Rubber Button
- Bubble Pouch

Serving NCR industries

CONTACT • MOB: 9457024766

EVA GASKET

FEATURES

- High-density EVA foam
- Shock absorbing
- Water resistant
- Custom sizes available

APPLICATIONS

- Solar inverters packaging
- Automotive components
- Electronics & electrical insulation

SPECIFICATIONS

Material: High-density EVA Foam
Density: 30–60 kg/m^3
Thickness: 1mm to 10mm
Temperature Range: -40°C to +70°C
Color: Black / White / Custom

Designed for reliable sealing, cushioning, and vibration damping in industrial and automotive applications. Custom shapes and sizes can be manufactured to meet client requirements.

SILICON GASKET

FEATURES •

- Heat resistant up to 250°C
- Flexible & durable
- Weatherproof
- Food grade option available
- Custom moulding to specification

APPLICATIONS •

- Solar inverters
- Electrical panels
- Automotive components
- Medical equipment

SPECIFICATIONS •

Material: High-quality Silicone Rubber

Temperature Range: -50°C to +250°C

Hardness: 40-70 Shore A

Thickness: 1mm to 8mm

Color: Orange / Custom colors available

Durable, flexible silicone gaskets designed for reliable heat, moisture and chemical resistance. Ideal for industrial, electrical and medical applications. Custom sizes and profiles available on request.

PLASTIC INJECTION MOULD COMPONENTS

FEATURES •

- Precision moulding for consistent quality
- Materials: Nylon66, ABS, PC
- High strength & rigid construction
- Custom made as per drawing / sample

MATERIAL OPTIONS •

- Nylon 66 (PA66) – high mechanical strength
- ABS – impact resistant & durable
- Polycarbonate (PC) – heat & impact resistance

APPLICATIONS •

- Solar equipment & junction boxes
- Electrical enclosures & connectors
- Automotive components

We manufacture custom plastic injection moulded components to precise specifications. Designed for durability, dimensional accuracy, and reliability in demanding industrial environments. Prototyping & bulk production available.

EPE FOAM FITMENTS

FEATURES •

- Protective foam cushioning
- Custom fitments to shape
- Lightweight & shockproof
- Anti-static and moisture resistant

BENEFITS •

- Safeguards components during transit
- Soft cushioning to prevent damage
- Customised to fit product perfectly

APPLICATIONS •

- Solar inverter packaging
- Electronics & devices packing
- Automotive parts protection

Our EPE foam fitments are designed to provide superior protection for delicate components. Lightweight, eco-friendly, and reusable, they offer excellent shock absorption and are tailored to your product dimensions for secure packaging.

PAPER INSULATION PRODUCTS

PRODUCT RANGE •

- Paper Insulation Paper
- Transparent Insulation Paper
- Fleece Paper
- Nomex (Nomax) Insulation Paper

FEATURES •

- Excellent electrical insulation
- Heat resistant & dielectric strength
- Moisture & chemical resistant
- Flexible & easy to laminate

APPLICATIONS •

- Transformers & motors
- Solar inverters
- Electrical panels & switchgear

SPECIFICATIONS •

Thickness: 0.05mm to 0.5mm
Temperature Class: Up to 220°C (Nomex)
Dielectric Strength: High
Available in Rolls & Sheets

Our paper insulation products provide reliable insulation and protection for electrical components. Durable, high-quality materials ensure safety and performance in demanding electrical and electronic applications. Available in various grades including Nomex for high temperature use.

RUBBER BUTTON

FEATURES •

- Durable rubber material
- Reliable push button performance
- Available in various sizes & shapes
- Excellent tactile response
- Temperature & moisture resistant

TYPES & VARIANTS •

- Circular push buttons
- Square & rectangular buttons
- Custom shaped keypads
- Colours: Black, Gray, White / Custom

APPLICATIONS •

- Electronics & control panels
- Household appliances
- Industrial equipment controls
- Medical & automotive electronics

Our rubber buttons are designed for durability and consistent performance in electronic devices. Available in custom sizes, profiles, and colors to suit your application. Press-activated, reliable, and long-lasting.

BUBBLE POUCH

Protective Packaging

FEATURES •

- Air bubble cushioning for protection
- Shockproof & impact resistant
- Lightweight & flexible
- Transparent & moisture resistant
- Reusable & eco-friendly

SPECIFICATIONS •

- Material: PE Bubble Film
- Available in multiple sizes
- Self-seal adhesive closure
- Thickness: 3mm to 5mm bubble

APPLICATIONS •

- Electronics & components packaging
- Solar components shipping
- Fragile goods protection
- E-commerce & online retail dispatch
- Industrial parts packaging

Our bubble pouches provide reliable cushioning to protect products during storage and transit. The air bubble layer absorbs shock and prevents damage to delicate items. Custom sizes and self-sealing bubble pouches are available to meet packaging requirements.
